ABOUT ME

Hello World! I love and enjoy the process and creativity that comes with building websites and apps. I am a graduate of The University of Sydney and Trilogy's Full-Stack Coding Bootcamp. During this course, I have acquired all necessary skills to build a full-stack website with languages such as HTML, CSS, JavaScript, React and many more listed below. I have had experience in building a website from scratch with other fellow web developers, so I understand the process and mindset behind building something from the bottom up as a team. I have also built a full-stack web application alone so I can further understand the process of being independent and relying on myself to achieve and accomplish what is needed to be done.

BIO

Birth Date
30th April 2003

Nationality
Australian

Location
Sydney, NSW
